

## BEMA Med Supplies:

TaiYi Acupuncture Needle  
太一針灸針

BEMA medical supply products are crafted with high standard workmanship & quality control. Each acupuncture needle underwent 11 manufacturing processes & 7 inspection procedures, creating a painless & stress-free experience for the practitioners & patients.

# Product benefits

## Japanese Stainless Steel

**TaiYi Acupuncture needles feature extra smooth surgical grade Japanese stainless steel, creating painless & stress-free patient experiences.** Each needle is manufactured with enhanced sturdy stainless steel handle, which is great for indirect moxibustion & transcutaneous electrical nerve stimulation (T.E.N.S.).

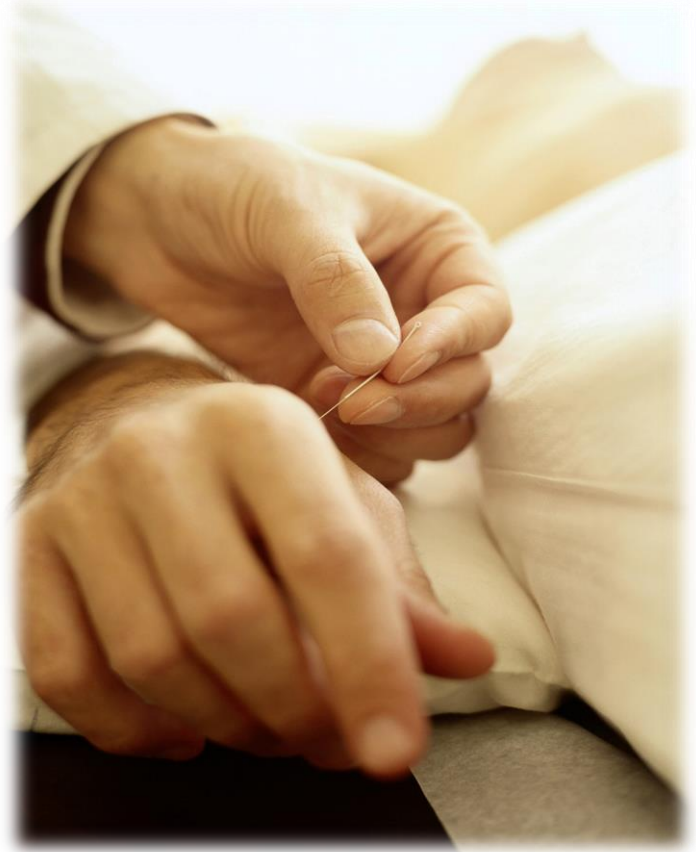

## 10K Clean-room Production

**TaiYi Acupuncture needles are manufactured in ISO Class 10,000 cleanroom standard factories.** A Class 10K cleanroom is designed to never allow more than 10,000 particles (0.5 microns or larger) per cubic foot of air; whereas a typical office building air contains from 500,000 to 1000,000 particles. Our high standard guarantees clean needle manufacturing.

# Product Details:
